KLEEMANN crusher jaws

YOUR SOLUTION FOR NATURAL STONE

Low to medium abrasive natural stone

CRUSHER JAW RT-XPERT CRUSHER JAW RT-XTRA

- > *Balanced quality with respect to lifetime, energy consumption and crushing pressure*
- > *Ideal tooth gap for best possible removal of fines*
- > *Reducing the flake proportion in the final product*
- > *XTRA with higher manganese content for extreme applications*

Abrasive natural stone

CRUSHER JAW FT-XPERT CRUSHER JAW FT-XTRA

- > *Especially powerful in abrasive material thanks to higher wear dimensions*
- > *Less space for fines (screening necessary)*
- > *Higher flake proportion in the final product*

KLEEMANN crusher jaws

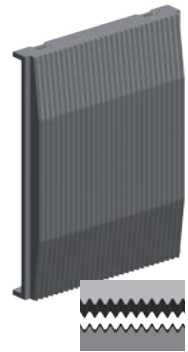

YOUR SOLUTION FOR RECYCLING

Rounded material (less abrasive)

CRUSHER JAW ST-XPERT

- > Efficient material grip with acute tooth profile
- > Reducing the flake proportion in the final product
- > Recommended for smaller gap widths (< 60 mm)

Rounded material (abrasive)

CRUSHER JAW RT-XPERT CRUSHER JAW RT-XTRA

- > Balanced quality with respect to lifetime, energy consumption and crushing pressure
- > Ideal tooth gap for best possible removal of fines
- > Reducing the flake proportion in the final product
- > XTRA with higher manganese content for extreme applications

Building rubble and recycling

CRUSHER JAW RT-XPERT CRUSHER JAW RT-XTRA

- > Balanced quality with respect to lifetime, energy consumption and crushing pressure
- > Ideal tooth gap for best possible removal of fines
- > Reducing the flake proportion in the final product
- > XTRA with higher manganese content for extreme applications

MOVING CRUSHER JAWS										
Machine type	Model	RT tooth shape (regular-teeth)			FT tooth shape (flat-teeth)			ST tooth shape (sharp-teeth)		
		Designation	TP*	Part No.	Designation	TP*	Part No.	Designation	TP*	Part No.
