GREAT CLASS, SMALL PACKAGE
THE SMALLEST PAVER OF THE NEW "DASH 5" GENERATION

A WIRTGEN GROUP COMPANY

THE NEW SUPER 800-5 P

GREAT CLASS, SMALL PACKAGE

VÖGELE

Compact dimensions

Compact dimensions make it suitable for applications in extremely confined conditions.

New hopper mechanism

The shallow hopper with a new hinging mechanism and the elevated paver operator's platform give operators the perfect overview.

ErgoBasic 5 operating concept

New ErgoBasic 5 operating concept for improved, intuitive operation.

THE NEW SUPER 800-5 P

GREAT CLASS, SMALL PACKAGE

NEW AND IMPROVED HOPPER MECHANISM

- > The gently sloping engine hood and the shallow hopper with its new hinging mechanism - as well as the more elevated operating position - significantly improve the operator's view.
- > The new hopper mechanism makes it possible to feed the paver with material asymmetrically from both sides.
- > The hinged elements reliably empty material onto the conveyor all the way from the edge - before the hopper has even been completely emptied.

NEW ERGOBASIC 5 OPERATING SYSTEM

- > The extra folding step and shallower material hopper give operators of different heights the perfect overview.
- > The operating data for the paver can be read off and adjusted on the new colour display. Relevant information about any warnings or error messages is shown in the display.
- > The position and slope of the ErgoBasic 5 console on the operator's platform can be perfectly adjusted to the operator's requirements.
- > Additional recesses on the ErgoBasic 5 console and

- a much larger paver operator's platform with side bracket make the paver feel even safer to drive.
- > Power supply for mobile terminal equipment.
- > Holder for brooms, shovels and tools available as an option.
- > The ErgoBasic 5 screed operator's console makes all paving-related functions quick and easy to set.
- > Operation of Auto Grade Basic Automated Grade and Slope Control is integrated in the ErgoBasic 5 screed operator's console.

FURTHER HIGHLIGHTS

- > The separately adjustable sides of the material hopper facilitate optimum, economical material feed.
- > Large material hopper and generous dumping width of over 3 m make it easy to feed with material.
- > The height-adjustable 24 V LED lighting makes operation easier and provides greater safety in the dark.
- > The auger tunnel lighting and the lighting of the levelling cylinders guarantee optimum visibility for paving. The foot area and access to the operator's platform are also illuminated for the operator's safety.
