TECHNICAL INFORMATION  I  MOBILE SCREENING PLANTS

MOBISCREEN MS 703/703i EVO
MOBISCREEN MS 703/703i EVO

Mobile triple-deck screening unit

Diesel-hydraulic drive

Classifying screen

Maximum feed size 100 x 160 mm

---

**TECHNICAL HIGHLIGHTS**

- Mobile triple-deck screening unit
- Diesel-hydraulic drive
- Classifying screen
- Maximum feed size 100 x 160 mm

---

1) with vibrating grate
MOBILE SCREENING PLANTS

The mobile screening plant MOBISCREEN MS 703 EVO is equipped with a 7 m² screen box and is used as a double-deck classifying screen. The plant is characterised by favourable transport dimensions and shut setup times. The screen plants are operated by a modern control system. All functions are thus easy to control, operating statuses and machine functions can be viewed at any time.

STANDARD EQUIPMENT
- Triple-deck classifying screen
- Hopper unit 8 m³
- Foldable tipping grid, gap width 100 mm, can be folded hydraulically (small remote control)
- Feeding conveyor, smooth belt
- Oversize grain conveyor, belt width 500 mm, discharge height max. 5,020 mm
- Side discharge conveyors, belt width 650 mm, discharge height max. 5,000 mm
- Fine grain discharge conveyor, belt width 1,200 mm, discharge height max. 4,500 mm
- Detachable, wired machine control system with the functions: crawler chassis, operation of discharge conveyors and foldable tipping grid (transport and production position), automatic mode, emergency off, moving support legs in and out, inclination adjustment for the fine grain conveyor and screen box, shifting and raising of the feeding conveyor, speed setting of hopper discharge conveyor, side discharge conveyors

OPTIONS
- Hopper unit 10 m³
- Wear lining made from wear-resistant steel (KRS) or rubber (for 8 and 10 m³)
- Vibrating slotted grate for separating feed material, gap width of upper deck 100 mm, gap width of lower deck 32 - 90 mm
- Dosing flap on hopper unit for continuous material flow
- Feeding conveyor, chevron belt made of solid rubber, prevents material from rolling back
- Material brake for feeding conveyor prevents material rolling back
- Material brake for screen prevents feed material leaping from the upper deck
- Oversize grain conveyor can be configured on the left or right, belt width 500 mm, discharge height 4,900 mm (no retrofit possible)
- Belt cover for the feeding conveyor or fine grain discharge conveyor
- External power supply - for cost-effective mains operation, switch between two energy sources possible; separate drive (diesel engine) or external power supply
- Start-Stop system (only for Tier 4f engines) for low consumption in idle phases
- Radio remote control: crawler chassis, oversize grain conveyor, slotted grate, emergency stop
- Remote control for foldable tipping grid, can be supplemented for wired remote control (omitted if plant is equipped with radio remote control)
- Line coupling for interlinking with other KLEEMANN plants
- Large selection of screen surfaces for all screens with different mesh widths
- Screen beaters for usage with sticky material
- Water spray system for dust reduction
- Lighting, halogen or LED
MOBISCREEN MS 703/703i EVO

Screen surfaces available in different mesh shapes, wire qualities and thicknesses:
- Square mesh
- Rectangular mesh
- Harp screens (G-harp, W-harp, S-harp, Varia harp)

Wedge strippers to protect the conveyor belts
- Wear reduction through abrasion-proof plastic materials
- Precise scrapers guarantee less material loss
- Available for:
  - Oversize grain conveyor (no front scraper but a beating roller)
  - Side discharge conveyor (no front scraper but a beating roller)
  - Fine grain discharge conveyor
  - Transfer conveyor (without wedge stripper)
  - Feeding conveyor, smooth
  - Hopper discharge conveyor
  - Cleated belt (no front scraper but a beating roller)
  - Feeding conveyor, cleated belt (no front scraper but a beating roller)

Closed multi-layered conveyor belts are suitable for all requirements and increase the conveying capacity of the plants
- Cleated belt with full-rubber edges guarantees optimum material transport
- Resilient rubber intermediate links dampen impacts of different materials
- Smooth design or cleated belt

High-quality rollers in the belt conveyors for transporting heavy material
- Simple on-site maintenance thanks to easily replaceable rollers
- Available in different versions:
  - Support roller for feeding
  - Lateral guide roller
  - Return roller
