
WITOS HCQ

Specific Terms and Conditions

("# WG-13")

Effective: 2021/05/05

Language: English

Terms and Conditions for Use of WITOS HCQ

HAMM AG - located Hammstr. 1, 95643 Tirschenreuth, GERMANY - has developed WITOS HCQ. The use of WITOS HCQ is based exclusively on these terms and conditions.

1. Subject of the Agreement

WITOS HCQ is a cloud-based application for the acquisition, processing, evaluation, visualization, and transmission of data recorded by the HCQ Navigator system integrated in the HAMM roller. WITOS HCQ monitors the compaction process of asphalt and earthwork rollers and assigns this data to a spatial position.

The data visible in WITOS HCQ represent a copy of the data recorded by the HCQ Navigator. WITOS HCQ enables live tracking of the compaction work via an internet connection with a suitable browser. The existing data can be retrieved from the system at any time in VETA format using a download function.

The HCQ Navigator system includes a receiver unit for satellite-based positioning (HCQ DGNSS receiver), a mobile tablet PC (HCQ Navigator Panel PC), and the HCQ Navigator Preparation, which is integrated in the machine and equipped with a tablet PC holder, electrical connections, and a control computer (Hamm Compaction Meter).

The data recording and visualization, as well as the provision of a Human-Machine Interface (HMI) is carried out using the HCQ Navigator software, which is installed on the HCQ Navigator Panel PC. The recorded data is transferred from the HCQ Navigator Panel PC to the WITOS HCQ via a mobile internet connection.

2. Relevant Validity of WITOS General Terms and Conditions (# WG-2)

To avoid repetition, the provisions of the "General Terms and Conditions for WITOS" (# WG-2) apply accordingly.

3. Data Protection

Personal data, such as the machine operator's name, are not generated or transferred. A detailed description of data processed by WITOS HCQ is contained in the WITOS HCQ Data Protection Declaration # WG-11 (European Economic Area [EEA]), # WG-12 (rest of the world).

4. Open-Source Software

The system software contains code protection of HAMM AG or third parties. The system software is licensed under the terms of this section and may contain third party code that is separately licensed in accordance with Annex 1. The license conditions of third parties take precedence. With regard to third party software components made available to the customer by HAMM AG, the respective software manufacturer's license conditions supersede these general terms and conditions, unless otherwise agreed. In regard to open-source software made available to the customer by HAMM AG, the granting of a relevant software user license and the customer's relationship with external software developers are exclusively subject to the currently applicable open-source license conditions. HAMM AG will provide the customer with these licensing conditions and the respective source code on request (email: opensource@wirtgen-group.com). The licensing conditions are also listed in Annex 1 (WG-14_120_Anhang1_Annex1_2021-05-05_HCQ_Third-party-notices_EN).

5. Country List

WITOS HCQ may only be used in a country indicated available (# WG-2_039_2020-07-15_WITOS_Anhang1_Annex1_Länderliste_Country_List_DE_EN).
